Reviews

The publication is fantastic and great. It can be rally exciting through reading period of time. I am just very happy to inform you that this is the greatest publication i actually have read in my very own daily life and could be he very best ebook for at any time.

Date :2008-7-1. Geometry-based robotics is a film about robotics has important applications in the exciting introduction of geometric concepts. Version 2 provides in-depth to explain the contents of related fields. and still maintain a unique style: its focus is not focused on the kinematics and robotics calculations. but on the latest materials containing extremely important. they reflect this an important progress in the field. and robotics and geometric group theory and the mathematical basis together. Main features: first of algebraic geometry. differential geometry and Lie groups and Lie algebras a brief overview of basic concepts; with a new chapter analyzes the Clifford algebra and the robot kinematics and three-dimensional Euclidean geometry linkages; use of robotics in the example to illustrate mathematical concepts and methods; use of new methods to solve the robot design and control of the important issues; application of the intersection theory of rigid-body motion group is given in the well-known robot kinematics solution to the problem of enumeration ; new content in another chapter. the constraints for the actuator with a terminal expansion of the dynamics of the robot. and thus derive the equations of motion parallel robot. Geometry-based robotics. applies to many areas of graduate students and research workers. especially for mechanical engineering. computer science and applied mathematics readers are particularly important. It is also a very rare reference books. Contents: Chapter 1 Introduction 1.1 The basic theory of robotics on Robotics and institutions 1.3 1.2 1.4 Algebraic Geometry Differential Geometry Lie 2.1 Chapter 2 2.2 Definitions and examples of other examples - 2.2.1 Matrix group orthogonal group $O(n)$ 2.2.2 The special orthogonal group $SO(n)$...
