

Brace for Impact: Surviving the Crash of the Industrial Age (Paperback)

Filesize: 6.51 MB

Reviews

This publication is fantastic. We have read through and i am certain that i will planning to read yet again yet again down the road. You wont feel monotony at at any time of your respective time (that's what catalogs are for concerning when you request me).

Heritage Associates, United States, 2013. Paperback. Book Condition: New. 228 x 150 mm. Language: English . Brand New Book ***** Print on Demand *****.The top 5 reasons we know the ultimate crash has already started, as explained in Brace for Impact: 1. We re running out of food. For six of the past 11 years, the world has eaten more food than it has produced. People in wealthy countries are as yet unscathed; they think it s just the poor end of the boat that is sinking. (Chapters One and Two) 2. We re running out of water. Lakes, rivers, reservoirs and aquifers everywhere are shrinking, with no hope of replenishment. Stand by to abandon Las Vegas. (Chapter Three) 3. We re running out of oil. Forget the hype about the mythical oil boom in the US, oil production continues to decline worldwide and will soon deprive the industrial economies of their oxygen -- cheap, plentiful oil. (Chapter Five) 4. We re running out of electricity. The power grid is aged, unstable and misused. Efforts to develop sustainable sources of electricity are doomed as long as they feed their product into the unsustainable grid. (Chapter Six explains the problem. For the solution, see Chapter Ten.) 5. We re running out of time. Global climate change, a threat multiplier for all the above, is coming on faster and harder than anyone predicted just a few years ago. It s too late to save everybody. But you can save anybody -- your family, your community -- by understanding the threat and learning the principles of sustainable living, and sanctuary, as explained by a veteran, nationally recognized environmental writer.
