

Theoretical astronomy relating to the motions of the heavenly bodies revolving around the sun in accordance with the law of universal gravitation, . of the geocentric and heliocentric

Filesize: 7.92 MB

Reviews

This composed book is excellent. This really is for all who statte that there had not been a worth reading through. Your life period will probably be change as soon as you total looking over this ebook.

(Cheyanne Barrows)

THEORETICAL ASTRONOMY RELATING TO THE MOTIONS OF THE HEAVENLY BODIES REVOLVING AROUND THE SUN IN ACCORDANCE WITH THE LAW OF UNIVERSAL GRAVITATION, . OF THE GEOCENTRIC AND HELIOCENTRIC

DOWNLOAD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 134 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: . . . n, n, n, and n are obtained, to compute from these and the data furnished directly by observation the curtate distances for the extreme places. The corresponding heliocentric places may then be found, and hence the position of the plane of the orbit as determined by the first and fourth observations. Thus, by means of the equations (37) and (38), we obtain $\log P = 0.0256953$, $\log p = 0.4492542$. With these values of p and p , the following heliocentric places are obtained: $l = 71651.54$, $\log \tan b = 8.4289064$, $\log r = 0.3083732$, $f = 913740.96$, $\log \tan 6 = 8.8638549$, $\log r = 0.3172678$. Then from $\tan t \sin(i - l) = \tan V \tan b \sec(f - 1)$, $\tan i \cos(i - l) = \tan b \tan 6 \operatorname{cosec} l$, we get $Sl = 2064245.23$, $i = 43649.76$. For the arguments of the latitude the results are $u = 1603035.99$, $u = 2445912.53$; Ecliptic and Mean Equinox 1864.0. The equations $\tan b \tan i \sin(J - \text{and})$, $\tan b \tan i \sin(i - Q)$, give $\log \tan 6 = 8.1827129$, $\log \tan b = 8.6342104$, and the comparison of these results with those derived directly from p and p exhibits a difference of 1.04 in b , and of -0.06 in h . Hence, the position of the plane of the orbit as determined from the extreme places very nearly satisfies the intermediate latitudes. If we compute the remaining...
