Excerpt: . . . of gas come out more rapidly on a sunny day than on a cloudy one. The more light there is, then, the more work the plant can do. This can be told in another way. Remove the bottle from the window and put it in a poorly lighted corner of the room. The gas is given off more slowly. Cover the bottle with dark cloth to shut out all light. In ten or fifteen minutes uncover it. The escape of the gas has ceased. Now place it in the brightly lighted window again. The bubbles soon start up afresh. Fig. 151. The tell-tale bubbles rising from a water plant. Do the pond scums do the same kind of work Many of you have seen the green-looking scum, as some people call it, which floats on the surface of ponds or on the water of ditches, and which is so abundant in the spring and autumn. This pond scum deserves a better name, for it is really made up of beautiful tiny plants, often consisting of silk-like threads, which we can see by lifting a bit of it from the water. To see that it does the same kind of work as the leafy water plant, place some in a bottle of water and set it in the window by the side of the other plants. The tell-tale bubbles show themselves here also. Now you have perhaps noticed that this pond scum, as it floats on...
