

## Advances in the Study of Gas Hydrates

Filesize: 6.39 MB

### ***Reviews***

*Merely no terms to spell out. It really is rally exciting throgh reading through period. Your daily life period is going to be enhance as soon as you complete looking over this ebook.  
(Yvette Marquardt)*

## ADVANCES IN THE STUDY OF GAS HYDRATES

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | This book had its genesis in a symposium on gas hydrates presented at the 2003 Spring National Meeting of the American Institute of Chemical Engineers. The symposium consisted of twenty papers presented in four sessions over two days. Additional guest authors were invited to provide continuity and cover topics not addressed during the symposium. Gas hydrates are a unique class of chemical compounds where molecules of one compound (the guest material) are enclosed, without bonding chemically, within an open solid lattice composed of another compound (the host material). These types of configurations are known as clathrates. The guest molecules, usually gases, are of an appropriate size such that they fit within the cage formed by the host material. Common examples of gas hydrates are carbon dioxide/water and methane/water clathrates. At standard pressure and temperature, methane hydrate contains by volume 180 times as much methane as hydrate. The United States Geological Survey (USGS) has estimated that there is more organic carbon contained as methane hydrate than all other forms of fossil fuels combined. In fact, methane hydrates could provide a clean source of energy for several centuries. Clathrate compounds were first discovered in the early 1800s when Humphrey Davy and Michael Faraday were experimenting with chlorine-water mixtures. | Preface - Section I Modeling of Hydrates - 1. Towards a full dynamic model of CO<sub>2</sub> hydrate formation in aqueous solutions - 2. Statistical Thermodynamic Model of Clathrate Hydrates with Multiple Filling of Cages - 3. Phenomenological Modeling of Hydrate Formation and Dissociation - 4. Effect of Conductive and Convective Heat Flow on Gas Production from Natural Hydrates by Depressurization - 5. An Application Used For Correcting Thermal Gradients Below Permafrost Using an Empirical Diffusion Model: Anadarko's Hot Ice no. 1 Gas Hydrates Case...
