In an economy where the competition turns on a dime and customers are loyal to the most recent piece of technology, engaged employees are the competitive advantage. The ability to engage employees in the success of the business is fast becoming a critical skill. . . and a professional requirement. Employee Engagement is a breakthrough in human resource thinking. Unlike the piecemeal or singular focus approaches that are scattered throughout the management literature, this book takes a systems approach to the concept of engagement. In doing so, it provides a blueprint for developing and implementing employee engagement from start to finish. The result of over 18 years of research and client application, this book reveals a proven approach for developing engaged employees. It includes: The Partnership Model that represents the winwin relationship between the company, the employees and the customer. The engagement survey that identifies the level of engagement at your company. . . and how to improve it. Actionable information and a critical tool for you. The Pyramid of Components; an abundant set of tools, techniques and processes that help you do what needs to be done. The role that incentives and ScoreCards play in a successful engagement strategy. A customizable implementation map that helps you develop a budget and manage the process from start to . . . sustainability. A reason for employees to become engaged. The knowledge in this book is the result of work performed with more than 35 companies, examples of which are listed below. Growing in the Great Recession: Change to a different business model A 65 person company in the service sector that needed to transition to a new business model as their...
